

# Setting up Cody Leaderboard

This document will go over how to set up the leaderboard for the Cody competition. To run the code, you will need MATLAB downloaded on your computer. MATLAB 2023b was used to make these files.

To set up the leaderboard follow these steps:

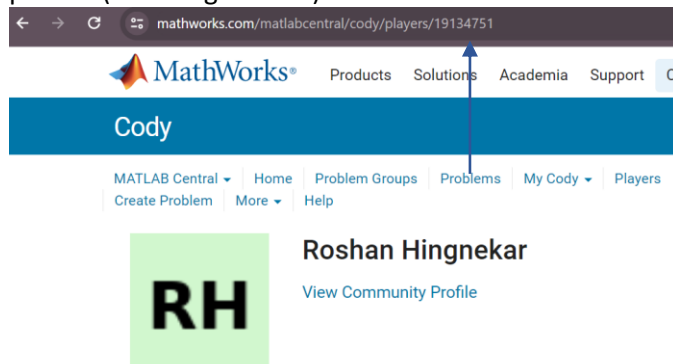

1. Download the 'Cody-Ambassador-Contest' Zip folder from the toolkit
  - [SharePoint Link](#)
  - Add the files to our MATLAB directory

2. Run the 'CodyAmbassadorsContest.prj' project file.

3. Download from the toolkit and **run** the leaderboardFromProfiles.mlx

4. The MATLAB Script will open
  - Add Start date and End date.
  - Add Players profile IDs
    - The profile ID of the player can be found in the address on the player's profile. (See image below)

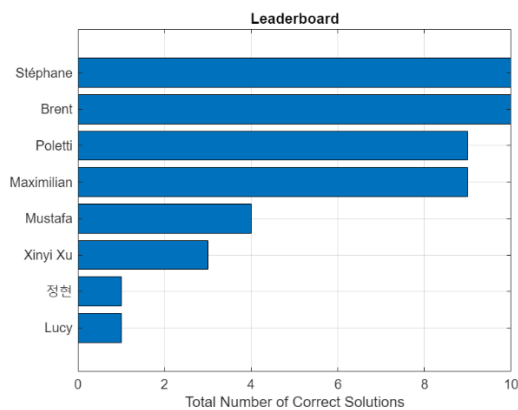

- 
- Enter Problem Group number
- Run the Script

5. Your scoreboard will be generated on the web!
